GAMEPLAY IN BRIEF

BASICS

Who Wants To Be A Millionaire? Live Roulette follows Single Zero Roulette rules and you can place your usual bets.

MILLIONAIRE NUMBERS

When bets are closed, 1-5 or 10 Millionaire Numbers are generated randomly.

MILLIONAIRE GAMES

When the ball stops on any of the Millionaire Numbers, depending on the icon displayed, one of three types of Millionaire Games is initiated and all players who managed to cover the winning number qualify. Not only Straight-Ups qualify, but also Split, Street, Corner/Basket and Line bets – all inside bets are eligible!

INSTANT X100

If the number shows 'x100', players receive and instant x100 Multiplier.

MILLIONAIRE ROUND

If the number shows a Millionaire logo or a question mark, the Millionaire Round starts, which consists of multiple levels, represented as a ladder. On each level, the player's goal is to guess which of the options (presented as A, B, C or D) grants the highest multiplier. The multipliers from different levels are accumulated. The 'X' symbol ends the round.

LIFELINES

There are three lifelines which can be triggered throughout the game:

- **50/50** - removes the two smallest Multipliers
- **Ask the Audience** - displays the answers as bar chart as if an audience had voted for them, and automatically selects the answer with the highest multiplier.*

Note: there is no audience, the info comes from the game Server.

- **Ask the Host** - the host can remove answers with lower multipliers. The higher the level, the less answers the host can remove.
